I do not support RM-10352. There is so little activity except for 3
weekends during the ARRL & CQWW 160 meter contests that should be able to work
any mode anywhere in the band. Ant's are usually very
restricted in bandwidth and don't want to have to change the ant to
work voice or CW. This is unnecessary and leave as is, the present
works fine, why mess with it to satisfy a few contesters who are pushing this.
